Subject: Application for summer Internship

Dear Hiring Team,

As a Computer Science student at the National School of Engineers of Carthage, I am eager to apply for a summer internship at **3S**. Your leadership in IT infrastructure integration and digital transformation aligns perfectly with my technical skills and passion for developing innovative, high-value solutions. I am particularly excited about the opportunity to contribute to cutting-edge projects and learn from your expertise in deploying advanced IT systems. I've gained practical experience through several academic and personal projects, including:

- A **project management app** using Angular, Spring Boot, and MySQL.
- A **platform for academic project submissions**, with secure role-based access.
- A **JavaFX hotel management system** and an **Android ticket-booking app**.

I thrive on solving real-world challenges and mastering emerging technologies. I'm particularly inspired by **3S's** commitment to delivering high-performance IT solutions and optimizing infrastructure for businesses. I would welcome the opportunity to contribute to your team by applying my skills and eagerness to learn in projects that drive digital innovation.

Thank you for considering my application. I look forward to the chance to learn and grow with you.

Best regards,

Nour Omri
